USTRANSCOM

Experimentation Activities Key Results

UNIFIED VIEW 06

Event / Activity Description

- A co-sponsored USTRANSCOM and USJFCOM experiment focusing on the integration of joint deployment and global distribution processes
- UNIFIED VIEW uses the JCIDS process with the goal of annual solutions delivered to the JROC

Participants: All Services, JFCOM, TRANSCOM, USSOCOM, EUCOM, Joint Staff, DLA, DISA

Key Objectives / Warfighter Challenges

- Integrating Sustainment Forecasting and Planning (SFP) with execution planning
- Improve support and execution of Global Force Allocation Management (GFAM) and the Joint Force Provider (JFP) mission

Key Findings:

- **The Functional Needs Analysis (FNA) Working Group analyzed and prioritized a comprehensive list of gaps. Two groups were selected for further study: Global Force Allocation Management and Sustainment Forecasting and Planning. These two study areas were vetted at the Joint Deployment and Distribution Conference and formed the basis for our UV 06 Functional Solution Analysis (FSA)**
- **DOTMLPF change recommendation (DCR) for Sustainment Forecasting and Planning has been initially briefed to the FL FCB Working Group and is being staffed for more coordination prior to KM/DS entry. Initial steps toward a comprehensive sustainment forecasting and planning process include standardization of terms and data elements across services and COCOMS**
- **GFAM Capabilities Production Document is in preparation for briefing to the C2 FCB, time TBD**
- **Way ahead: Continue staffing with the goal of JROC approval of solutions during FY 07.**

Title X Wargames

Event / Activity Description

- USTRANSCOM participated in numerous Title X wargames including UNIFIED ENGAGEMENT 06, Sealift 06 and Global Mobility Wargame 06.

Participants: Various

Key Objectives / Warfighter Challenges

- Provide a realistic transportation perspective to the wargames
- Test, vet, refine and socialize Deployable Distribution Command and Control elements including JDDOC, Joint Task Force-Port Opening and Director of Mobility Forces-Surface

Key Findings:

- Title X Wargames are an excellent venue for concept development. Received praise from OSD (Mr. Marchant) during recent visit for seeking out wargames for concept development.
- USTRANSCOM will continue to play in wargames within the limitations of our manning and budget restraints. Funding for COCOM participation in Title X wargames would allow more comprehensive participation.

Near Term Experimentation Activities

UNIFIED VIEW 07

Event / Activity Description

- A co-sponsored USTRANSCOM and USJFCOM experiment focusing on the integration of joint deployment and global distribution processes.
- UNIFIED VIEW uses the JCIDS process with the goal of annual solutions delivered to the JROC

Participants: **All Services, DLA, COCOMS, DISA**

Key Objectives / Warfighter Challenges

- TBD: Since UNIFIED VIEW does annual FAA, FNA and FSA workshops, focus areas and gaps/challenges to be worked for the UV 07 cycle are not yet identified.
- UNIFIED VIEW does examine identified gaps for consideration annually during our FNA workshops.

Events / Milestones

- Proposed Calendar on next slide

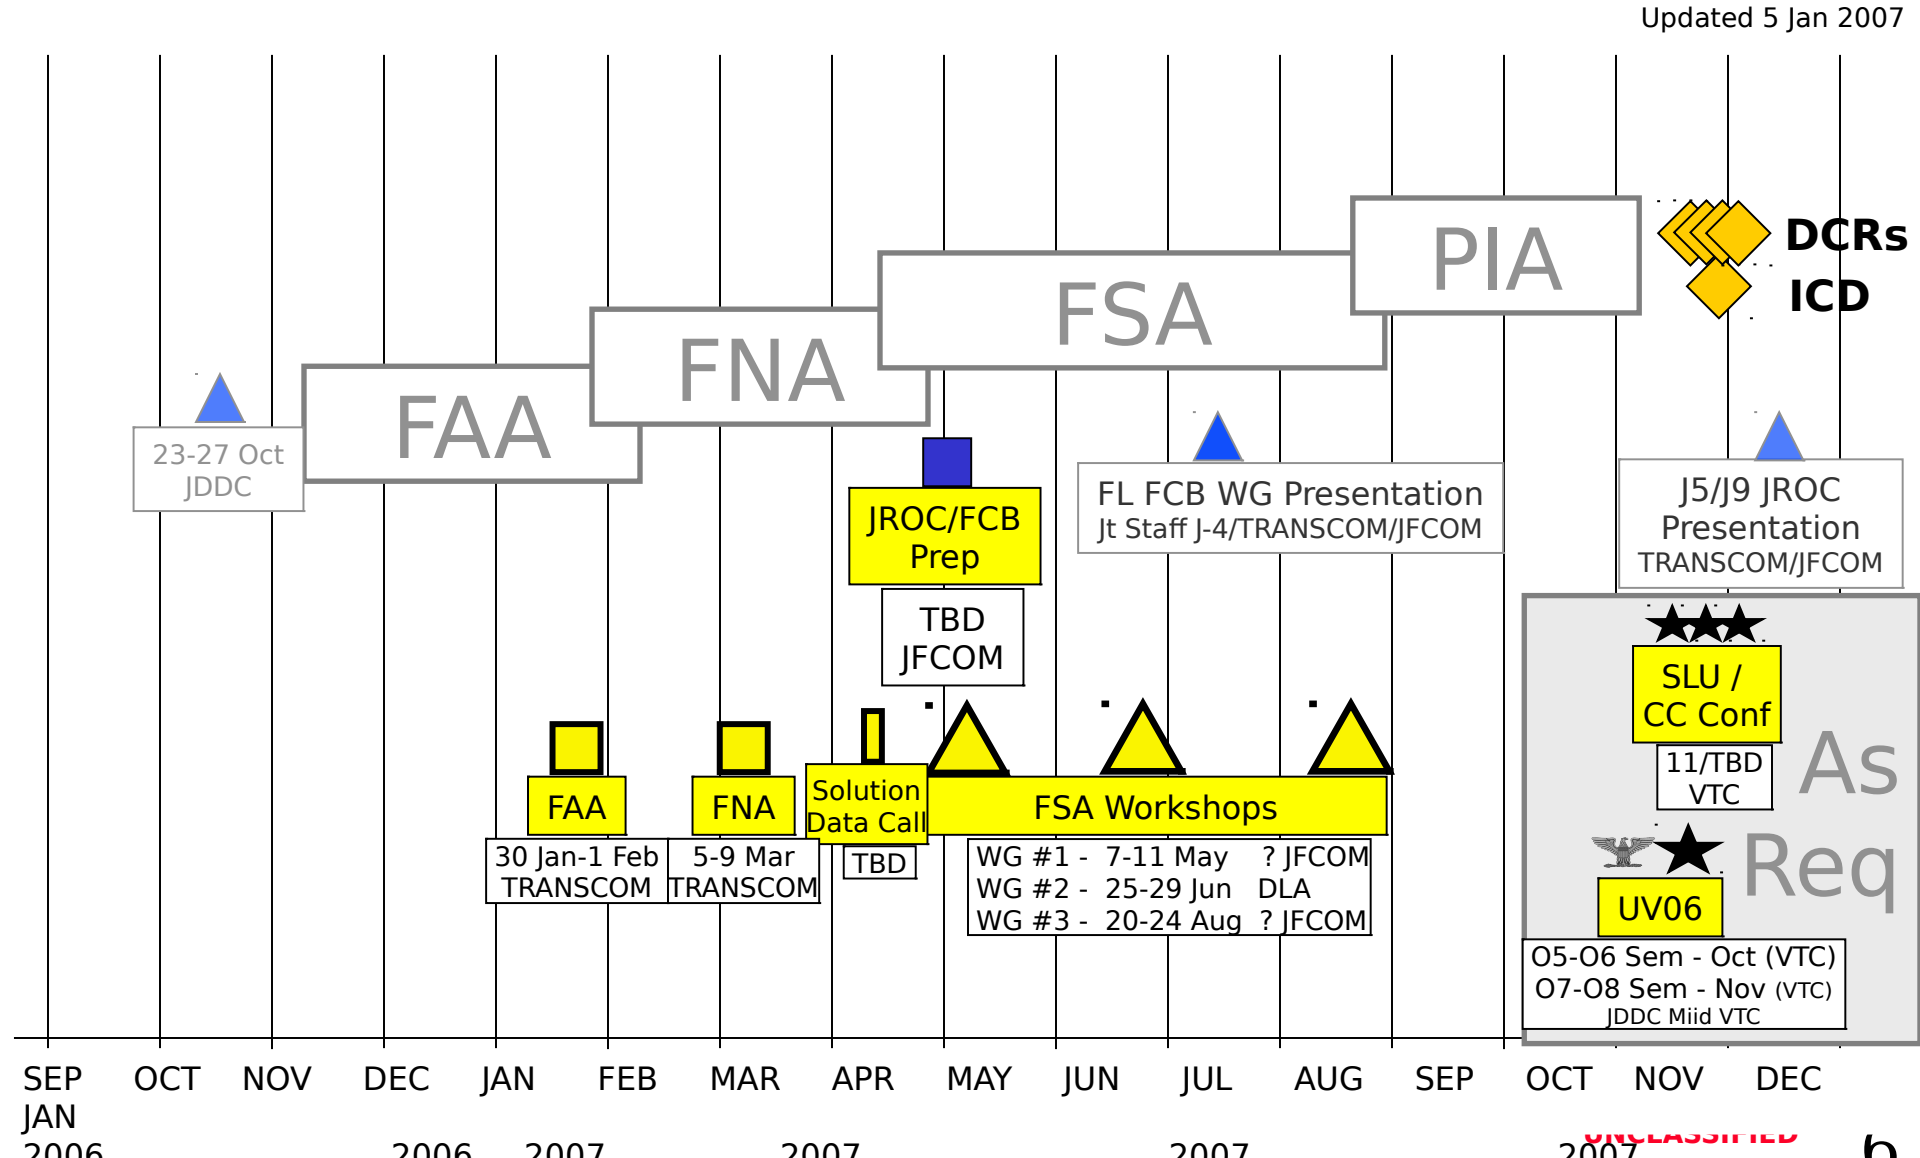
UV07 Schedule (Proposed)



UNCLASSIFIED

Title X Wargames & MNE 5

Event / Activity Description

- USTRANSCOM will participate in numerous Title X wargames including UNIFIED QUEST 07, Global Mobility Wargame 07.
- USAF's Futures Capability Game (if there is a logistics seminar)
- Multinational Experiment 5

Participants: Various

Key Objectives / Warfighter Challenges

- Provide a realistic transportation perspective to the wargames
- Continue to test, vet, refine and socialize Deployable Distribution Command and Control elements including JDDOC, Joint Task Force-Port Opening and Director of Mobility Forces-Surface
- MNE 5 is USTRANSCOM's first involvement in the MNE series. Since we are pre-IPC, objectives are not yet defined

Events / Milestones

- USTRANSCOM is not the lead agency on any of these events, rather we leverage the venues for concept development. USTRANSCOM has limited resources for concept development and does not host/lead any concept development events in addition to UNIFIED VIEW.
